

### New Year's Christmas trees 2019 / 2020

New Year fir trees 2019 are offering more tree for less money. All New Year's trees have an outstanding natural look because they are made very precisely. They also have an exceptional green colour and are made from best quality materials which add to their final look. Material is fire retardant and is harmless for your health. We offer different models of Christmas trees, from 90 cm to 366 cm. Almost all models have a very quick folding mechanism for an easy deploy of your tree. All our trees are very dense and have the best natural look. All trees that we offer have a very realistic look.

**A Natural look of an artificial fir tree is very important.**

Artificial fir trees by Bonsai have the best natural look.

The crowns of our trees have lots of branches which include very small details. Tips of spruce needles are rolled up towards the middle of the tree. The middle of a branch is a natural brown colour and the needles are a light green colour. They are a very good imitation of natural trees.

#### **Perfect New Year fir trees**

By purchasing a tree, you get a metal or wooden stand (depending on the kind of tree) and a box that provides the best storage for your tree. Artificial trees have a very compact construction. Artificial trees – Christmas trees, that have needles made from PE material (needles which have a real touch effect), have no problem with needle fallout.

In this year's offer, we also have baskets, which are an excellent decoration for our artificial trees. We are also offering smaller models of fir trees, up to 90 cm of height and ornamental wreaths.

## New Year's artificial trees Bonsai 2019/ 2020

### ARTIFICIAL TREE BERLIN

This year's hit is our New Year fir tree Berlin, which has countless amounts of spruce needles made from PE and Pvc material. It also contains needles that feel and look very natural and realistic. The specialty of this artificial fir tree is also in its shape. It has a distinctly step-shaped form, which adds a very natural look to the tree. A metal stand and instructions for easy assembling are attached. Artificial fir trees are packed in hard cardboard packaging, perfect for storage.
